

ADVANCED IMAGE PROCESSING

ORAL AIP

Présenté par :
Rodrigo César COELHO FERNANDES
Vinette Marcy GADEU MONTHE
Master 2 SD Parcours A2IA

Supervisé par :
Mme Caroline PETITJEAN

Année-Académique:2025/2026

TP1 - IMAGE DENOISING

Original Image

Noisy Image (Gaussian)

Bilateral Filter (OpenCV)

Bilateral Filter (Scratch)

Objective: Compare
different image
denoising methods

Gaussian noise
(mean=0, sigma=10)

sigmaColor=30
sigmaSpace=30

sigmaSpace – Controls how much spatial distance influences the weighting.

sigmaColor – Controls how much intensity difference influences the weighting.

d – Diameter of the pixel neighborhood

cv2 vs Scratch
0.4s vs 49s

Isotropic Diffusion

Anisotropic Diffusion

Filter	Parameters	MSE	PSNR	SSIM
Bilateral (ours)	d=5, sigma=20	26.38	33.92	0.8630
Bilateral (cv2)	d=9, sigma=20	26.88	33.84	0.8685
Gaussian	d=3, sigma=3	52.63	30.92	0.8108
Isotropic Diffusion	n_iter=5 kappa=0.05	0.0006	31.90	0.8092
Anisotropic Diffusion	n_iter=5 kappa=0.05	0.0007	31.79	0.8084
